SQL	PuTTY
JQuery	GIT
Node Js	Oracle
AJAX	Aginity
	Snaplogic
	Informatica
	Cognos

Experience

Senior IT Analyst

2015-Current

Magellan Health

Annapolis, MD

As an analyst in a data warehouse I am responsible for large quantities of data being processed daily with hundreds of jobs to maintain and multi-task to ensure that all data is available. Able to troubleshoot and resolve any issues that happen each day. Works well with a team and can clearly and efficiently communicate with multiple teams at one time to ensure proper resolution.

- Worked on job rewrite from Oracle OWB to PL/SQL
- Built jobs in Cognos for reporting

Manager

2011-2015

The Loft llc.

Essex, MD

Worked directly with owners and customers to ensure that day to day functions ran smoothly. Responsibilities included accounting daily banking functions writing checks to vendors and tracking all cash flow with a software program. Oversaw the installation of new computer system and implemented and configured those system for use in all areas. Had to keep track of all inventory to make sure that we did not run out of product or order to much.

- Run reports and analyze data to maintain cost using Access
- Troubleshoot reports and workflows to ensure accurate data
- In charge of daily cash balance and inventory reporting (Access)
- Handling customer issue and complaints in appropriate manner
